Certification bodies	External	Assess conformity of the company against ISO Standards	Effective implementation of ISO Standards with all relevant clauses in the organization	Customer recognize, reliable with minimum cost	World recognition
Staff	Internal	Responsible for realization of organization product	Continuation of job, timely wages with all applicable benefits to pay the cost of living	Loyalty with organization, concentration on work	Increase in loyalty

3.3 Integrated Management System and its Processes

G.M.DALUI & SONS PRIVATE LIMITED	CCPL/QMS/01
	Issue 01 Rev-00
QUALITY MANAGEMENT SYSTEM MANUAL	Date: 05/01/2025
	Page 10 of 44

G.M.DALUI & SONS PRIVATE LIMITED has established and implemented the QMS, which is maintained and continually improved according to the requirements of the ISO 9001:2015, standards including processes needed and their interactions. G.M.DALUI & SONS PRIVATE LIMITED determined the processes needed for the QMS and their application through the organization.

G.M.DALUI & SONS PRIVATE LIMITED determined required inputs and desired outputs of the processes, criteria, and methods needed for effective operation and control of these processes, as well as resources needed and responsibilities and authorities for processes in the QMS Cross Reference. During management review, top management of G.M.DALUI & SONS PRIVATE LIMITED evaluates processes and makes changes needed in order to ensure that the processes achieve intended results and improve processes and the QMS.

4. Leadership

4.1 Leadership & Commitment

4.1.1 General

The Management of G.M.DALUI & SONS PRIVATE LIMITED in conjunction with the QHSE team provides evidence of its leadership and commitment to the development and implementation of the management system and continually improving its effectiveness by:

- a) Taking accountability of the effectiveness of the management system;
- b) Ensuring that the QMS Policy and management objectives are established for the management system and are compatible with the strategic direction and the context of the organization;
- c) Ensuring the integration of the management system requirements into the organization's other business processes, as deemed appropriate;
- d) Promoting awareness of the process approach;
- e) Ensuring that the resources needed for the management system are available;
- f) Communicating the importance of effective integrated management and of conforming to the management system requirements;
- g) Ensuring that the management system achieves its intended results;
- h) Engaging, directing and supporting persons to contribute to the effectiveness of the management system;
- i) Promoting continual improvement;
- j) Supporting other relevant management roles to demonstrate their leadership as it applies to their areas of responsibility
- k) Adopts a "hands on" approach to leadership through effective meetings at irregular basis.

4.1.2 Customer focus

G.M.DALUI & SONS PRIVATE LIMITED	CCPL/QMS/01
	Issue 01 Rev-00
QUALITY MANAGEMENT SYSTEM MANUAL	Date: 05/01/2025
	Page 11 of 44

The management of G.M.DALUI & SONS PRIVATE LIMITED adopts a customer-first approach which ensures that customer needs and expectations are determined, converted into requirements and are met with the aim of enhancing customer satisfaction.

This is accomplished by assuring:

- a) Customer and applicable statutory and regulatory requirements are determined, understood and consistently met;
- b) The risks and opportunities that can affect conformity of products and services and the ability to enhance customer satisfaction are determined and addressed;
- c) The focus on enhancing customer satisfaction is maintained
- d) Ensuring that our products or service has minimal effect on the environment
- e) Ensuring that our products or service has minimal effect on health and safety of personnel

4.2 QMS Policy

4.2.1 Establishing QMS Policy

The management together with QHSE team have developed the Policies for Quality, Health, Safety and Environment, defined in section 1 (A) above, that governs day-to-day operations to ensure quality; health, safety, and environmental process are being implemented.

The QMS Policies are released as a standalone document as well, and is communicated and implemented throughout the organization.

Our QMS Policies;

- Are appropriate to the scale and nature of its activities;
- Address its commitment with respect to Quality, Health & Safety and Environment as per the requirements of the standard
- Include a frame work for setting and reviewing integrated objectives and targets.
- Addresses our commitment to prevent injury, ill health, any damage to environment and to take adequate measures to monitor, review and continually improve QMS Systems and its performance.
- Includes a commitment to comply with all regulatory and legal requirements

4.2.2 Communicating QMS Policy

The Integrated Management Policy is communicated within the organization through internal meetings, by displaying at key locations throughout the workplace, by posting at sites and included in the employee training. Communications to external parties are through brochures and websites.

Printed copy of the policy will be made available to the public / interested parties on written request to the QHSE team lead.

G.M.DALUI & SONS PRIVATE LIMITED	CCPL/QMS/01
	Issue 01 Rev-00
QUALITY MANAGEMENT SYSTEM MANUAL	Date: 05/01/2025
	Page 12 of 44

An insight about the organizational goals, objectives, targets, and key elements of the integrated management system are shared with new employees as a part of their orientation.

During the Management Review Meetings (MRM), management reviews the policy statement, key system elements to ensure its appropriateness, effectiveness and continued suitability to the organization. Additional review of the QMS policy is carried out whenever there is change in business plan, location, corporate structure, and change in regulatory or legal requirements which are required to be complied with.

4.3 Organizational Roles Responsibilities and Authorities

The Management has assigned responsibilities and authorities for all relevant roles in the company. These are communicated through the combination of the G.M.DALUI & SONS PRIVATE LIMITED Organizational Chart, projects organization chart, job description and responsibility and authority matrixes specific and relevant to each stand operating procedure.

4.4 HSE Consultation and Participation of Workers

G.M.DALUI & SONS PRIVATE LIMITED	CCPL/QMS/01
	Issue 01 Rev-00
QUALITY MANAGEMENT SYSTEM MANUAL	Date: 05/01/2025
	Page 15 of 44

G.M.DALUI & SONS PRIVATE LIMITED has established, implemented and maintain a process for consultation and participation of workers at all applicable levels and functions, and, where they exist, workers' representatives, in the development, planning, implementation, performance evaluation and actions for improvement of the OH&S management system.

G.M.DALUI & SONS PRIVATE LIMITED has:

- a) provide mechanisms, time, training and resources necessary for consultation and participation;
- b) provide timely access to clear, understandable and relevant information about the OH&S management system;
- c) determine and remove obstacles or barriers to participation and minimize those that cannot be removed;
- d) emphasize the consultation of non-managerial workers on the following:
 1. determining the needs and expectations of interested parties;
 2. establishing the OH&S policy;
 3. assigning organizational roles, responsibilities and authorities, as applicable;
 4. determining how to fulfil legal requirements and other requirements;
 5. establishing OH&S objectives and planning to achieve them;
 6. determining applicable controls for outsourcing, procurement and contractors;
 7. determining what needs to be monitored, measured and evaluated;
 8. planning, establishing, implementing and maintaining an audit programme(s);
 9. ensuring continual improvement;
- e) emphasize the participation of non-managerial workers in the following:
 1. determining the mechanisms for their consultation and participation;
 2. identifying hazards and assessing risks and opportunities;
 3. determining actions to eliminate hazards and reduce OH&S risks;
 4. determining competence requirements, training needs, training and evaluating training;
 5. determining what needs to be communicated and how this will be done;
 6. determining control measures and their effective implementation and use;
 7. Investigating incidents and nonconformities and determining corrective actions.

6. Planning

6.1 Actions to Address Risks and Opportunities

G.M.DALUI & SONS PRIVATE LIMITED	CCPL/QMS/01
	Issue 01 Rev-00
QUALITY MANAGEMENT SYSTEM MANUAL	Date: 05/01/2025
	Page 16 of 44

When planning our QMS, G.M.DALUI & SONS PRIVATE LIMITED has taken into consideration potential issues and has determined the risks and opportunities that need to be addressed to:

- a) provide assurance that the QMS can achieve its intended result;
- b) enhance desirable effects;
- c) prevent, or reduce, undesired effects;
- d) achieve improvement;

G.M.DALUI & SONS PRIVATE LIMITED has planned actions to address the above risks and opportunities and has initiated appropriate procedures to integrate and implement appropriate actions into our QMS including the evaluation of the effectiveness of our QMS processes. Any actions taken to address risks and opportunities shall be proportionate to the potential impact on the conformity of products and services.

While planning for the QMS, G.M.DALUI & SONS PRIVATE LIMITED has considered the issues referred to in 4.1 and the requirements referred to in 4.2 and developed a mechanism to identify the risk and opportunity that need to be addressed to

1. Assure the QMS in place can achieve the intended outcome
2. Enhance desirable effects,
3. Prevent, or reduce undesired effects
4. Achieve improvement.

G.M.DALUI & SONS PRIVATE LIMITED shall establish, maintain and implement a procedure to identify Environmental aspects & Hazards related to its activities, products and services and products taking into account planned or new developments, new or modified activities, service provision. A system based on extent, severity and frequency is defined to identify significant aspects. For all significant aspects & hazards the measurable and achievable targets are set and the results are monitored.

6.2 QMS Objectives and Planning to Achieve Them

QMS Objectives have been established at all corresponding levels and processes throughout G.M.DALUI & SONS PRIVATE LIMITED to implement the QMS Policy, meet and exceed requirements for product and processes, and to improve the QMS and its performance QMS Objectives: QMS objectives are strategic, apply to the entire Company and shall:

1. be consistent with the QMS Policy;
2. be measurable and monitored;
3. take into account applicable requirements;

G.M.DALUI & SONS PRIVATE LIMITED	CCPL/QMS/01
	Issue 01 Rev-00
QUALITY MANAGEMENT SYSTEM MANUAL	Date: 05/01/2025
	Page 17 of 44

4. be communicated;
5. be updated as appropriate;
6. Be relevant to the conformity of products, services and enhance customer satisfaction.

QMS Performance Objectives are measurable targets for improving operational performance to ensure process conformity and customer satisfaction. They apply to all departments and functions having direct responsibility for activities that require improvement.

6.3 Planning of Changes

When changes to QMS are deemed necessary, G.M.DALUI & SONS PRIVATE LIMITED has ensured the change will comply with the requirements of QMS and shall consider:

1. the purpose of the changes and their potential consequences;
2. the integrity of QMS;
3. the availability of resources;
4. The allocation or reallocation of responsibilities and authorities.

7. Support

7.1 Resources

7.1.1 General

G.M.DALUI & SONS PRIVATE LIMITED determines and provides the resources needed:

- a) to implement and maintain the management system and continually improve its effectiveness
- b) to enhance customer satisfaction by meeting customer requirements

Resource allocation is done with consideration of the capability and constraints on existing internal resources, as well as needs related to subcontractor and supplier expectations.

7.1.2 People

G.M.DALUI & SONS PRIVATE LIMITED identifies personnel training needs, provides the required training, and evaluates the effectiveness of the training provided. Personnel assigned to perform specific tasks, operations and processes are qualified on the basis of appropriate education, experience or training. Employees are made aware of the relevance and importance of their activities and how they contribute to the achievement of QMS objectives. Records of personnel qualifications and training are maintained.

7.1.3 Infrastructure at Work

G.M.DALUI & SONS PRIVATE LIMITED	CCPL/QMS/01
	Issue 01 Rev-00
QUALITY MANAGEMENT SYSTEM MANUAL	Date: 05/01/2025
	Page 18 of 44

G.M.DALUI & SONS PRIVATE LIMITED determines, provides and maintains the infrastructure needed to achieve conformity to product requirements. Infrastructure includes, as applicable:

- a) buildings, workspace and associated facilities;
- b) process equipment, hardware and software;
- c) supporting services such as transport;
- d) Information and communication technology.

Resources are allocated against forecasted requirements and are reviewed and supplemented where necessary.

Proprietor is responsible for the allocation and review of resources. Resources include:

- Office Building, Workspaces, Desks, Conducive Environment
- Supporting services such as transportation, telephones, fax, Internet and network.
- Construction Plant and Equipment.
- Personnel Protective Equipment

To keep all personnel of the organization motivated, we provided suitable supporting facilities such as communication, transportation and accommodation facilities.

Infrastructure required in achieving project and service conformity such as equipment, hardware, workspaces and associated utilities are provided within appropriate functions.

7.1.4 Environment for the Operation of Processes

G.M.DALUI & SONS PRIVATE LIMITED provides a clean, safe and well-lit working environment. The Management of G.M.DALUI & SONS PRIVATE LIMITED manages the work environment needed to achieve conformity to product requirements. Specific environmental requirements for products are determined during QHSE planning and are documented in subordinate procedures, work instructions, or job documentation.

Human factors are considered to the extent that they directly impact on the quality of product and project delivery. Work environment at the workplaces are maintained as appropriate for the operations and complying with the regulatory requirements.

Where appropriate, hazardous material warning and safety notices are posted. It is ensured that all personnel are wearing the appropriate personnel protective equipment at site and First Aid boxes are available. To keep the safe work environment suitable for the respective work areas, procedures and work instructions are issued to defined locations / holders for reference by personnel.

7.1.5 Monitoring and Measuring Resources

Where equipment is used for critical measurement activities, such as inspection and testing, these shall be subject to control and either calibration or verification. Calibration

G.M.DALUI & SONS PRIVATE LIMITED	CCPL/QMS/01
	Issue 01 Rev-00
QUALITY MANAGEMENT SYSTEM MANUAL	Date: 05/01/2025
	Page 19 of 44

intervals and who is to perform the calibration are documented on the individual equipment records.

Calibrations are performed in accordance with the schedule and any equipment whose calibration period has expired is withdrawn from service. A suitable storage environment is provided and controls to allow only authorized use. Items of HSE related measuring and test equipment such as noise meters, anemometer, etc. are also controlled by the documented procedure or as explained in the related HSE plan.

Measurement items attached to items of plant and machinery that are provided by suppliers are calibrated and tested by the supplier of the item of plant and machinery. The management and procedure of measuring and test equipment is controlled and documented in the project related and specific QHSE plans.

7.1.6 Organizational Knowledge

G.M.DALUI & SONS PRIVATE LIMITED also determines the knowledge necessary for the operation of its processes and to achieve conformity of products and services. This may include knowledge and information obtained from:

- a) Internal sources, such as lessons learned, feedback from subject matter experts, and/or intellectual property;
- b) External sources such as standards, academia, conferences, and/or information gathered from customers or subcontractors and suppliers.

This knowledge shall be maintained, and made available to the extent necessary. When addressing changing needs and trends, G.M.DALUI & SONS PRIVATE LIMITED shall consider its current knowledge and determine how to acquire or access the necessary additional knowledge. G.M.DALUI & SONS PRIVATE LIMITED Knowledge Center, is a one-point access for the whole organization to obtain knowledge of the QMS system and other relevant knowledge of the organization. The Knowledge Center is managed and controlled by the QHSE team lead.

7.2 Competence

Staff members performing work affecting product quality and HSE performance are competent on the basis of appropriate education, training, skills and experience. This is assessed and evaluated through recruitment, client assessment and approval when assigned to a project site, site performance observations and client feedback.

QHSE training is provided at commencement of each project and upon each new joining staff member. The documented procedure in the related QHSE plans defines these activities

G.M.DALUI & SONS PRIVATE LIMITED	CCPL/QMS/01
	Issue 01 Rev-00
QUALITY MANAGEMENT SYSTEM MANUAL	Date: 05/01/2025
	Page 20 of 44

in detail. All employees are evaluated on their performance by their superior/ line manager annually.

7.3 Awareness

Training and subsequent communication ensure that staffs are aware of:

- a) The Integrated QMS policy;
- b) Relevant management objectives;
- c) Any significant environmental impact which is related or potentially associated to their works.
- d) Health and safety Hazards which have been identified through a risk based approach.
- e) Their contribution to the effectiveness of the management system, including the benefits of improved performance;
- f) The implications of not conforming with the management system requirements including not fulfilling the organization's compliance obligations.

7.4 Communication

7.4.1 General

G.M.DALUI & SONS PRIVATE LIMITED shall ensure and maintain effective communications both internally and externally to those interested parties and any compliance obligations it may have through various communication tools.

G.M.DALUI & SONS PRIVATE LIMITED shall ensure that effective communications through a process of 'what, when, with whom and how' to ensure that all interested parties are kept up to date with the organization's QHSE process were applicable.

7.4.2 Internal Communication

The management of G.M.DALUI & SONS PRIVATE LIMITED ensures internal communication takes place regarding the effectiveness of the management system. Internal communication methods include:

- use of corrective action processes to report nonconformities or suggestions for improvement
- use of the results of analysis of data
- meetings (periodic, scheduled and/or unscheduled) to discuss aspects of the QMS
- use of the results of the internal audit process
- regular company meetings with all employees
- internal emails
- memos to employees

G.M.DALUI & SONS PRIVATE LIMITED	CCPL/QMS/01
	Issue 01 Rev-00
QUALITY MANAGEMENT SYSTEM MANUAL	Date: 05/01/2025
	Page 21 of 44

G.M.DALUI & SONS PRIVATE LIMITED “open door” policy which allows any employee access to the Management for discussions on improving the management system.

7.4.3 External Communication

We have an effective system for communication with customers. Information about the range of services offer is being given to the client by:

- Meeting client personnel
- Submitting pre-qualification dossier.

During tenders, all communications and clarifications are addressed to relevant personnel indicated in the tender documents. During contract execution, the Project Manager becomes the focal point of all communications with the client. All correspondence is therefore routed through the Project Manager.

Co-ordination procedure for submissions and correspondence as operated by clients is complied with. Amendments and variations in contracts are normally agreed in writing. Where verbal instruction is given, this will be confirmed in writing to the client.

All external communication must be approved by the related management or its delegated representative. All communication shall be recorded for reference purpose.

The external communication regarding HSE legal requirement / local municipality is conducted by the Management or the QHSE team.

7.5 Documented Information

The management system documentation includes both documents and records.

The extent of the management system documentation has been developed based on the following:

- a) The size of G.M.DALUI & SONS PRIVATE LIMITED
- b) Complexity and interaction of the processes
- c) Risks and opportunities
- d) Competence of personnel
- e) HSE legal and other requirements.

The purpose of document control is to ensure that staffs have access to the latest, approved information, and to restrict the use of obsolete information. All documented procedures are established, documented, implemented, maintained and made accessible to concerned staff through ENVISION EQUIPMENTS' Knowledge Center.

These controls are applicable to those records which provide evidence of conformance to requirements; this may be evidence of design requirements, contractual requirements, procedural requirements, or statutory/regulatory compliance. In addition, QSHE records include any records which provide evidence of the effective operation of the management system.

G.M.DALUI & SONS PRIVATE LIMITED	CCPL/QMS/01
	Issue 01 Rev-00
QUALITY MANAGEMENT SYSTEM MANUAL	Date: 05/01/2025
	Page 22 of 44

8. Operation

8.1 Operational planning and control

G.M.DALUI & SONS PRIVATE LIMITED defines the expectation and implements controls for each of our QMS processes. The planning of controls is required to ensure consistent acceptability of products and services. Planning processes include the definition of QMS quality objectives, development for required processes, the establishment for appropriate verification programs and the requirement for records necessary to demonstrate the process and products conform to intended requirements. Operational planning and control are required prior to new and/or revised products or processes being implemented. Such planning is accomplished through:

- a) Determining the requirements for the delivery of contracting projects;
- b) Establishing criteria for the processes and the acceptance of trading and contracting requirements;
- c) Determining the resources needed to achieve conformity to the trading and contracting delivery requirements;
- d) Implementing control of the processes in accordance with the criteria;
- e) Determining, maintaining and retaining documented information to the extent necessary to have confidence that the processes have been carried out as planned and to demonstrate the conformity of trading and contracting to their requirements;
- f) Adopt a life cycle management culture where applicable through the aspect and impact assessment;
- g) The design and development of all G.M.DALUI & SONS PRIVATE LIMITED products and services that ensure to have a minimal impact on the environment;
- h) Ensuring that all materials, services and subcontractors and suppliers have minimal impact on the environment where applicable.
- i) Communicate relevant environmental information to interested parties that may have a significant impact.
- j) Ensure that adequate planning is conducted for health and safety prior to work commencing.
- k) Provide a HSE plan for project execution
- l) Risk assessment shall be conducted with adequate control measures in place where required.
- m) Ensure adequate recourses are available to conduct the task.

Outsourced processes and the means by which G.M.DALUI & SONS PRIVATE LIMITED controls them are defined in the documented procedure.

8.2 Requirements for Products and Services

8.2.1 Customer Communication

G.M.DALUI & SONS PRIVATE LIMITED	CCPL/QMS/01
	Issue 01 Rev-00
QUALITY MANAGEMENT SYSTEM MANUAL	Date: 05/01/2025
	Page 23 of 44

G.M.DALUI & SONS PRIVATE LIMITED has implemented effective communication with customers in relation to:

- a) Providing information relating to the construction and other infrastructure elements;
- b) Handling enquiries, contracts or orders, including changes;
- c) Obtaining customer feedback relating to products and services, including customer complaints;
- d) Handling or controlling customer property;
- e) Establishing specific requirements for contingency actions, when relevant.

8.2.2 Determining the Requirements Related to Products and Services

During the intake of new business G.M.DALUI & SONS PRIVATE LIMITED captures:

- a) Requirements specified by the customer, including the requirements for delivery and post-delivery activities;
- b) Requirements not stated by the customer but necessary for specified or intended use, where known
- c) Statutory and regulatory requirements related to the construction and other infrastructure elements;
- d) Any additional requirements determined by G.M.DALUI & SONS PRIVATE LIMITED

8.2.3 Review of Requirements Related to Products and Services

Once requirements are captured, G.M.DALUI & SONS PRIVATE LIMITED reviews the requirements prior to its commitment to deliver the contract for roads and infrastructure construction. This review ensures that G.M.DALUI & SONS PRIVATE LIMITED has the capability and capacity to:

- a) Meet all requirements specified by the customer, including requirements for delivery and post-delivery activities;
- b) Meet any requirements not stated by the customer, but which G.M.DALUI & SONS PRIVATE LIMITED knows as being necessary;
- c) Meet all requirements determined necessary by G.M.DALUI & SONS PRIVATE LIMITED itself;
- d) Meet all related statutory and regulatory requirements;
- e) Meet any contract or order requirements differing from those previously expressed (i.e., from a previous G.M.DALUI & SONS PRIVATE LIMITED tender bid).

8.2.4 Changes to Requirements for Products and Services

G.M.DALUI & SONS PRIVATE LIMITED updates all relevant requirements and documents when the requirements are changed, and ensures that all appropriate staffs are notified. This is explained in the project specific QHSE plan, document control that comprehends RIF's, revision control and distribution as well as method of document management system, as

G.M.DALUI & SONS PRIVATE LIMITED	CCPL/QMS/01
	Issue 01 Rev-00
QUALITY MANAGEMENT SYSTEM MANUAL	Date: 05/01/2025
	Page 24 of 44

some project sites work with electronic documents management system in daily operations.

ISO 14001:2015 & ISO 45001:2018

8.2 Emergency preparedness and Response

G.M.DALUI & SONS PRIVATE LIMITED establishes, implement and maintains a process needed to prepare for and respond to potential emergency situations, as identified in Manual.

- a) Establishing a planned response to emergency situations, including the provision of first aid;
 - b) Providing training for the planned response;
 - c) Periodically testing and exercising the planned response capability;
 - d) Evaluating performance and, as necessary, revising the planned response, including after testing and, in particular, after the occurrence of emergency situations;
 - e) Communicating and providing relevant information to all workers on their duties and responsibilities;
 - f) Communicating relevant information to contractors, visitors, emergency response services, government authorities and, as appropriate, the local community;
 - g) Taking into account the needs and capabilities of all relevant interested parties and ensuring their involvement, as appropriate, in the development of the planned response.
- G.M.DALUI & SONS PRIVATE LIMITED shall maintain and retain documented information on the process (es) and on the plans for responding to potential emergency situations.

8.3 Design and Development of Products and Services

This clause is not applicable as G.M.DALUI & SONS PRIVATE LIMITED does not design or develop anything but all its activities are performed as per customer specifications.

8.4 Procurement and Control of Externally Provided Processes, Products and Services

G.M.DALUI & SONS PRIVATE LIMITED ensures that purchased materials, or other subcontracted services conform to specified procurement requirements. The type and extent of control applied to the supplier and the procured products or services are dependent on the effect on the product delivery.

G.M.DALUI & SONS PRIVATE LIMITED evaluates and selects suppliers and subcontractor based on their ability to supply products and services in accordance with the project and contract requirements, the organization's QSHE requirements, that of ISO 9001:2015 and environmental requirements. Criteria for selection, evaluation and re-evaluation are established.

Procurements are made via the release of formal purchase orders, LPO's or contracts which clearly describe what is being procured and the terms of delivery and installation. Received

G.M.DALUI & SONS PRIVATE LIMITED	CCPL/QMS/01
	Issue 01 Rev-00
QUALITY MANAGEMENT SYSTEM MANUAL	Date: 05/01/2025
	Page 25 of 44

products or services are then verified against requirements to ensure satisfaction of requirements. Suppliers and subcontractors who do not provide conforming products or services will be rejected and requested to conduct formal corrective action.

8.5 Production and Service Provision

8.5.1 Control of Production and Service Provision

To control its provision of construction of roads and infrastructure, G.M.DALUI & SONS PRIVATE LIMITED considers, as applicable, the following:

- The availability of documents or records that define the characteristics of the trading & contracting and infrastructure as well as the results to be achieved;
- The availability and use of suitable monitoring and measuring resources;
- The implementation of monitoring and measurement activities;
- The use of suitable work infrastructure and environment;
- The appointment of competent persons, including any required qualifications;
- The validation and revalidation of special processes if applicable (see below);
- The implementation of actions to prevent human error;
- The implementation of release, delivery and post-delivery activities.

8.5.2 Identification and Traceability

Where appropriate, G.M.DALUI & SONS PRIVATE LIMITED identifies its construction elements or other critical process outputs by suitable means. Such identification includes the status of the contracting element with respect to monitoring and measurement requirements.

If unique traceability is required by contract, regulatory, or other established requirement, G.M.DALUI & SONS PRIVATE LIMITED controls and records the unique identification of the contracting elements.

The documented procedure for material handling and storage in each project specific QMS plan defines these methods in detail.

8.5.3 Property Belonging to Customers or External Providers

G.M.DALUI & SONS PRIVATE LIMITED exercises care with customer or supplier property while it is under the organization's control or being used by the organization. Upon receipt, such property is identified, verified, protected and safeguarded. If any such property is lost, damaged or otherwise found to be unsuitable for use, this is reported to the customer or supplier and records maintained.

For customer intellectual property, including customer furnished data used for design, production and / or inspection, this is identified by customer and maintained and preserved to prevent accidental loss, damage or inappropriate use.

G.M.DALUI & SONS PRIVATE LIMITED	CCPL/QMS/01
	Issue 01 Rev-00
QUALITY MANAGEMENT SYSTEM MANUAL	Date: 05/01/2025
	Page 26 of 44

8.5.4 Preservation

G.M.DALUI & SONS PRIVATE LIMITED preserves conformity of product or other process outputs during internal processing and delivery. This preservation includes identification, handling, packaging, storage, and protection. Preservation also applies to the constituent parts of a product.

The documented procedure in the project specific QMS plan defines the methods for preservation of product.

8.5.5 Post-Delivery Activities

As applicable, G.M.DALUI & SONS PRIVATE LIMITED conducts the following activities which are considered “post-delivery activities”:

- Customer Satisfaction Survey
- Repair of defect client QMS or warranty
- Final document handing over
- Photograph the completed project, if possible

Post-delivery activities are conducted in compliance with the management system defined herein. In determining the extent of post-delivery activities that are required, G.M.DALUI & SONS PRIVATE LIMITED considers:

- a) Statutory and regulatory requirements;
- b) The potential undesired consequences associated with its construction delivery products;
- c) The nature, use and intended lifetime of its of construction products;
- d) Customer requirements;
- e) Customer feedback.

8.5.6 Control of Changes

G.M.DALUI & SONS PRIVATE LIMITED reviews and controls both planned and unplanned changes to processes to the extent necessary to ensure continuing conformity with all requirements.

The change management process below allows an effective response to change and to facilitate contingency plans for any anticipated change. Once a change is identified, evaluation is carried out in order to assist with the decision-making process. Evaluation steps include assessment and optimum selection of change.

8.6 Release of Products and Services

G.M.DALUI & SONS PRIVATE LIMITED	CCPL/QMS/01
	Issue 01 Rev-00
QUALITY MANAGEMENT SYSTEM MANUAL	Date: 05/01/2025
	Page 27 of 44

The Proprietor has overall responsibility for planning and implementing the inspection and test activities needed to verify that product requirements are met at appropriate stages of the product realization process.

When the organization uses (external) sampling inspection as a means of product acceptance, the plan is statistically valid and appropriate for use. The plan precludes the acceptance of lots whose samples have known nonconformities. When required, the plan is submitted for customer approval.

Evidence of conformity with the acceptance criteria is maintained. Records indicate the person authorizing the release of the product. Product release and service delivery does not proceed until all the planned arrangements have been satisfactorily completed, unless otherwise approved by a relevant authority, and where applicable by the customer.

Measurement requirements necessary for product acceptance are documented; subsequent acceptance records form the storage documentation evidence. Storage documentation evidence includes the following data:

Criteria for acceptance and rejection

Locations in the process sequence where measurement and testing operations were performed

Types of measurement instruments used, including any instructions associated with their use

Test records showing actual test results data where required by the specification or acceptance test plan.

8.7 Control of Nonconforming Outputs

G.M.DALUI & SONS PRIVATE LIMITED takes appropriate action based on the nature of the nonconformity and its effect on the conformity of products and services. This also applies to nonconforming products and services detected after delivery of products, during or after the provision of services. G.M.DALUI & SONS PRIVATE LIMITED deals with nonconforming outputs in one or more of the following ways:

- a) Correction;
- b) Segregation, containment, return or suspension of the provision of products and services;
- c) Informing the customer;
- d) Obtaining authorization for acceptance under concession.

Conformity to the requirements are verified when nonconforming outputs are corrected.

9. Performance Evaluation

9.1 Monitoring, Measurement, Analysis and Evaluation

9.1.1 General

G.M.DALUI & SONS PRIVATE LIMITED	CCPL/QMS/01
	Issue 01 Rev-00
QUALITY MANAGEMENT SYSTEM MANUAL	Date: 05/01/2025
	Page 28 of 44

G.M.DALUI & SONS PRIVATE LIMITED has determined which aspects of its integrated management system must be monitored and measured, as well as the methods to utilize and records to maintain, within this Integrated Management System Manual and subordinate documentation.

All major HSE incidents or lost time injuries undergo an investigation to identify the root cause of the incident.

From relevant records, statistical data is produced that is used for the monitoring of the HSE objectives, targets and control measures, and the effectiveness of corresponding corrective and preventive actions taken.

G.M.DALUI & SONS PRIVATE LIMITED collates weekly or monthly performance evaluation through QHSE meetings, progress reports and QMS objectives reporting to monitor the effectiveness of the system, and compliance to applicable Legislation and other requirement.

9.1.2 Customer Satisfaction

As one of the measurements of the performance of the management system, G.M.DALUI & SONS PRIVATE LIMITED monitors information relating to customer perception as to whether the organization has met customer requirements. Corrective actions system shall be used to develop and implement plans for customer satisfaction improvement that address deficiencies identified by these evaluations, and assess the effectiveness of the result.

9.1.2 Evaluation of compliance

Top management will take a lead role in ensuring that compliance in all areas is reviewed, controlled and maintained. The level of compliance and areas of compliance will be determined by the top management and reviewed at regular intervals. Each person is responsible for compliance in their own area of operations.

Evaluation of compliance will be managed in the following ways:

- Continual monitoring of QHSE requirements
- Review at all levels of the business to ensure local, national and international compliance is monitored
- Implement processes in the business to evaluate compliance
- Implement processes to correct any compliance deficiencies and prevent recurrence.

9.1.3 Analysis and evaluation

G.M.DALUI & SONS PRIVATE LIMITED analyzes and evaluates the data and information arising from monitoring and measurement in order to evaluate:

- a) Conformity of products and services;

G.M.DALUI & SONS PRIVATE LIMITED	CCPL/QMS/01
	Issue 01 Rev-00
QUALITY MANAGEMENT SYSTEM MANUAL	Date: 05/01/2025
	Page 29 of 44

- b) The degree of customer satisfaction;
- c) The performance and effectiveness of the integrated management system;
- d) If planning has been implemented effectively;
- e) The effectiveness of actions taken to address risks and opportunities;
- f) The performance of external providers;
- g) The need for improvements to the integrated management system.

Statistical techniques used may be defined in appropriate documented procedures; in all cases, the methods are based on established standards or are otherwise determined to be statistically valid.

9.2 Internal Audit

G.M.DALUI & SONS PRIVATE LIMITED conducts internal audits at planned intervals to determine whether the management system conforms to contractual and regulatory requirements, to the requirements of ISO 9001, ISO 14001 & ISO 45001, and to management system requirements. **Internal audit frequency of G.M.DALUI & SONS PRIVATE LIMITED is annually.** Audits also seek to ensure that the management system has been effectively implemented and is maintained.

The results of these audits provide the basis for the reports to senior management for their management review of the system.

Trends determined from analysis of corrective action requests, non-conformance reports and similar indicators of system performance are also used to maintain and develop the system. Staffs are encouraged to suggest improvements at any time.

Internal audits are controlled by a documented procedure and are conducted in accordance with the prepared annual schedule.

Site Specific internal audits including internal audits of subcontractors, are explained in the internal audit procedure in the relevant project specific QHSE plan.

Roles & Responsibilities

Lead Auditor: The responsible for scheduling audits falls on the Lead Auditor, his duties include carrying out some of the audits on the schedule, controlling the schedule and making sure the audits are carried out to an acceptable standard, and reporting audit findings to management. The Lead Auditor is the first point of arbitration in the event of an auditor/audited disagreement.

Auditor: Responsible for carrying out audits to schedule and to an acceptable quality, for ensuring that audit reports are sufficiently detailed to enable analysis by others and for verifying effective closure of identified non-conformances.

Corrective Action

Corrective action is required on all audit non-conformances raised. The audited is responsible for deciding on the course of corrective action, the internal auditor is

G.M.DALUI & SONS PRIVATE LIMITED	CCPL/QMS/01
	Issue 01 Rev-00
QUALITY MANAGEMENT SYSTEM MANUAL	Date: 05/01/2025
	Page 30 of 44

responsible for verifying its effective implementation. Corrective action should wherever economically viable reduce or eliminate the chance of recurrence. The audit program manager is responsible for reviewing corrective action status on periodic basis to ensure that there are no undue delays in carrying out the corrective action.

Preventive Action

Audit non-conformances shall be summarized periodically and presented at performance review meetings. Those present shall assess the potential for preventive actions to be applied through consideration of the summarized findings. For example, to consider whether a problem identified and resolved in one area can potentially arise in another area, and so assess the need for preventive action outside of the problem area.

9.3 Management Review

9.3.1 General

Top management reviews G.M.DALUI & SONS PRIVATE LIMITED QMS, at planned intervals, to ensure its continuing suitability, adequacy, effectiveness and alignment with the strategic direction.

9.3.2 Management review inputs

Management Review is planned and carried out taking in to Consideration:

- The status of actions from previous management reviews;
- Changes in external and internal issues that are relevant to the integrated management system;
- The needs and expectations of interested parties, including compliance obligations and legal requirements;
- Results of evaluation of compliance with legal requirements and other requirements
- Information on the performance and effectiveness of the integrated management system,
- Customer satisfaction and feedback from relevant interested parties (Customer / staff complaint etc)
- The extent to which quality, environment and OH&S objectives have been met;
- Process performance and conformity of products and services;
- Nonconformities and corrective actions;
- Monitoring and measurement results;
- Audit Results (internal / external / customer / HSE / Environmental Agency)
- The performance of external providers;
- The adequacy of resources;
- Consultation and participation of workers

G.M.DALUI & SONS PRIVATE LIMITED	CCPL/QMS/01
	Issue 01 Rev-00
QUALITY MANAGEMENT SYSTEM MANUAL	Date: 05/01/2025
	Page 31 of 44

- The effectiveness of actions taken to address risks and opportunities;
- Its significant environmental aspects;
- Fulfilment of its compliance obligations;
- Incident, nonconformities, corrective actions and continual improvement;
- Opportunities for improvement.

9.3.3 Management review outputs

The outputs of the management review include decisions and actions related to:

- a) Opportunities for improvement
- b) Any need for changes to the QMS
- c) Additional resource requirements

G.M.DALUI & SONS PRIVATE LIMITED retains documented information as evidence of the results of Management reviews.

Responsibilities for required actions are assigned to members of the management review team. Any decisions made during the meeting, assigned actions, and their due dates are recorded on the management review presentation.

Any decisions made during the Management Review Meetings will be implemented and communicated to all relevant parties, including any external parties.

The Management of the Company wish to continually improve the QMS and will actively monitor the system and oversee all decisions made by the Audit Team.

10. Improvement

10.1 General

G.M.DALUI & SONS PRIVATE LIMITED uses the management system to improve its processes, products and services. Such improvements aim to address the needs and expectations of customers as well as other interested parties, to the extent possible.

The results of analysis shall be used to evaluate:

- a) Conformity of products and services;
- b) The degree of customer satisfaction;
- c) The performance and effectiveness of the management system;
- d) The effectiveness of planning;
- e) The effectiveness of actions taken to address risks and opportunities;
- f) The performance of external providers;
- g) Other improvements to the management system.

10.2 Nonconformity and corrective action

G.M.DALUI & SONS PRIVATE LIMITED	CCPL/QMS/01
	Issue 01 Rev-00
QUALITY MANAGEMENT SYSTEM MANUAL	Date: 05/01/2025
	Page 32 of 44

G.M.DALUI & SONS PRIVATE LIMITED takes corrective action to eliminate the cause of nonconformity in order to prevent recurrence.

The control of non-conformances and corrective action are detailed in each project QHSE plan specific to that project. Non-conformances issued by Clients on a project site are not viewed as customer complaints, but a normal part of the operation process and are recorded as external NCR log on site.

All internally and externally raised non-conformance reports, and their supporting documentation, are controlled by the QHSE team on site through logs, and are reviewed for close out and trends. Identified NCR's are subject to Root Cause Analysis and proposed corrective action.

Likewise, the company takes corrective action to eliminate the causes of potential nonconformities in order to prevent their reoccurrence and uses site observation to emphasize that. G.M.DALUI & SONS PRIVATE LIMITED is committed to continue improving the below areas as an ongoing vision.

THE LIST IS INFINITE: -

- Increasing Customer Satisfaction
- Reducing Project Cost
- Reducing Project Timescales
- Improving Built Quality
- Reducing Environmental Impact
- Increasing Productivity
- Accident Reduction
- Reduction in Non-Conformance
- Reduce HSE incidents

10.3 Continual Improvement

Through the process effectiveness review, done as part of Management Review, G.M.DALUI & SONS PRIVATE LIMITED works to continually improve the suitability, adequacy and effectiveness of the integrated management system. This includes seeking opportunities for improvement.

It is the policy of G.M.DALUI & SONS PRIVATE LIMITED to continually seek ways to improve the effectiveness of the management system and operations through the review of policies, processes, objectives, audit results, analysis of data, correctives and preventive actions and management review.

It is the responsibility of each manager to review and processes and functions with this staff to correct deficiencies and to find opportunities for improvement.

Everyone within the business has the opportunity to put forward improvement suggestions.

G.M.DALUI & SONS PRIVATE LIMITED	CCPL/QMS/01
	Issue 01 Rev-00
QUALITY MANAGEMENT SYSTEM MANUAL	Date: 05/01/2025
	Page 33 of 44

11. Risk Management

11.1 General

G.M.DALUI & SONS PRIVATE LIMITED has developed a risk management system which includes a two-tier process; Tier one includes risk and opportunities which is at the high level of both business risk and opportunities and is controlled through the Risk and Opportunities Management.

Tier two level deals with operational day to day HSE risk management and is controlled through the Hazard & Risk Management.

11.2 Environmental aspects and impacts

Our objective is to Eliminate, Reduce, Isolate, and Control (ERIC) The environment Aspects and Impacts are measured on the significance of importance by giving a numerical value and colour sequence during the assessment:

a)	Low conditions	1-2	Green	Acceptable
b)	Medium conditions	3-5	Yellow	Tolerable
c)	High conditions	6-9	Blue	Moderate
d)	High conditions	10-15	Grey	Substantial
e)	Very high conditions	16-25	Red	Unacceptable

Environmental Impact and Mitigation Measures

Regular monitoring is required during construction to determine whether environmental standards and regulations are being complied with.

Air Quality

During construction, air quality and the occupational health of working laborers can be impacted by the generation of dust (particulate matter and total suspended particulates), and to a lesser extent, air emissions, which include combustion and exhaust gases of NO₂ and SO₂.

As long as the proper precautions and control measures to minimize air emissions of NO₂ and SO₂ are carried out, including the regular inspection and maintenance of all construction machinery, the impact will be minimal.

Additionally, since the impact is expected to be temporary and localized to the project area, only visual observations of heavy smoke or fumes, indicating a strong release of combustion and exhaust gases will be required during construction to monitor these air emissions.

G.M.DALUI & SONS PRIVATE LIMITED	CCPL/QMS/01
	Issue 01 Rev-00
QUALITY MANAGEMENT SYSTEM MANUAL	Date: 05/01/2025
	Page 34 of 44

Soil and Groundwater

Appropriate control measures must be employed to prevent contamination of the groundwater. As part of the environmental management requirements of G.M.DALUI & SONS PRIVATE LIMITED, groundwater quality within the site and camp should be regularly monitored during construction.

Additionally, in the event of a non-compliance or contamination incident, and after the appropriate incident response procedures and contingency plan are in place, emergency soil and groundwater monitoring will also be conducted. The parameters to be tested will be determined by the nature and scale of the spill or leak to the ground.

Fuel

The consumption of fuel at site and camp is tracked from the purchase records i.e. fuel pump station invoices and weight slips (if purchased in bulk quantities). Weekly the fuel consumption data is obtained from the purchase department and recorded in the weekly statistic.

- Tips to minimize fuel consumption
- Equipment, machinery and plant should be in good operating condition and maintained free of leaks,
- Drive only when needed
- Keep the windows closed.
- Minimize air conditioning.
- Replace dirty air filters.
- Maintain proper tire inflation.

Water

Non-drinking water consumption is monitored from the number of water tankers of known capacity used/offloaded at site and camp. A designated supervisor is assigned to count the number of trips made by water tankers. Drinking water consumption is tracked from the units (cubic meter) consumed. The water consumed is calculated and recorded in weekly statistics.

A prerequisite for understanding how to reduce water usage on construction sites is to have a clear understanding of where water is used, how much is used, where water is being wasted and what behaviors and/or technologies can be introduced to successfully reduce water wastage.

The first and immediate priority for reducing water use on construction sites is to eliminate/minimize water wastage.

- Improve efficiency of water using processes

G.M.DALUI & SONS PRIVATE LIMITED	CCPL/QMS/01
	Issue 01 Rev-00
QUALITY MANAGEMENT SYSTEM MANUAL	Date: 05/01/2025
	Page 35 of 44

- Offset consumption of mains water with alternative sources such as water from lagoons.
- Water efficient bathroom products and taps should be installed.
- Water meter adapter / add-on
- Auto shut-off taps.
- Ensure water supply able to be switched off at point of use e.g. through trigger guns on hoses.
- Auto shut-off taps (e.g. trigger type hoses/taps)
- Use temporary settlement lagoons and look at early construction of lagoons so that they can be utilized early.
- Milling materials to be spread on access roads.
- Recovery of water for re-use of lorry washouts

Electricity

As currently diesel driven generator are used to supply power to all site. Therefore, no such systems are implemented to monitor the consumption of electricity. However, efforts are made for installation of energy efficient products at site and site offices. Some other tips are:

- Maximizing natural day light by using natural light instead of overhead or fluorescent light.
- Normally work is executed in day time only.
- Use of low voltage products.
- Adjusting thermostat in the offices based on season.

Environment and Waste Management

G.M.DALUI & SONS PRIVATE LIMITED has considered the control measures to minimize waste as well as ensure the proper management and disposal of all solid and liquid waste generated during construction is provided in this control plan.

The following hierarchy for waste management is always preferred:

- Waste avoidance and/or reduction.
- Reuse.
- Recycle.

Diverting the waste stream in these ways means that waste storage, treatment and disposal options can be reduced. Minimizing the amount of waste on site not only protects the environment but it has the potential to cut down costs that may be incurred by G.M.DALUI & SONS PRIVATE LIMITED or the proponent for handling and disposing of the waste. Construction sites should pursue this hierarchy and seek out waste minimization opportunities first and foremost, followed by proper waste storage and disposal.

G.M.DALUI & SONS PRIVATE LIMITED	CCPL/QMS/01

11.3 Hazard identification and Assessment of Risk and Opportunities

G.M.DALUI & SONS PRIVATE LIMITED line management are responsible for ensuring that formal action is taken to identify hazards, assess risks and implement suitable control measures for all activities for which they are responsible.

Each site/facility owned or operated by G.M.DALUI & SONS PRIVATE LIMITED or location where G.M.DALUI & SONS PRIVATE LIMITED carry out their duties and activities must have a Risk Assessment Procedure, which covers identification of health, safety and environmental hazards and assessment of risks at a level of detail appropriate for the site and which takes into account the specific requirements of applicable local regulations. As a minimum, this procedure must include:

Carry out tour of the facility/site identifying potential hazards including: sources of fuel for a fire; fire ignition sources such as electrical equipment; escape route blockage; unguarded equipment; poor housekeeping; potential for pollution etc.

Review presence and condition of protective systems such as fire detection and protection equipment and associated maintenance records.

As low as reasonably practicable, take action to (in order of preference):

- Eliminate the hazard
- Prevent incidents occurring
- Protect people should any incident occur
- Reduce the consequences of an incident
- Identify users of non-renewable resources (materials and energy) and review potential for improvements, including the use of recyclable consumables.
- Formally record actions taken in a risk assessment report.
- Review of the Risk Assessment Procedure to confirm it remains appropriate for the site and is up to date.
- Repeat the process as often as appropriate for the site, but at least once every 6 months or if there is a significant change to operation.

The responsibility for ensuring preparation, maintenance and implementation of the Risk Assessment Procedure is that of the Project Manager at each location. It is the responsibility of the Project Manager to ensure that the documented HSE objectives are met.

Risk Assessment

Risk assessment must be done by the concerned Engineer/Supervisor using the appropriate format and reviewed by the HSE Officer. The records must be maintained by the HSE Officer for Client's Audit and future requirements.

Risk Assessment meeting will be held prior to start the work on site with all site engineers, foremen, equipment and work shop representative to explain the project risk assessment

G.M.DALUI & SONS PRIVATE LIMITED	CCPL/QMS/01
	Issue 01 Rev-00
QUALITY MANAGEMENT SYSTEM MANUAL	Date: 05/01/2025
	Page 37 of 44

related to G.M.DALUI & SONS PRIVATE LIMITED and control measures required to minimize and control the risk (HSE Manager will lead that meeting).

All site engineers and foremen shall receive copy of the risk assessment for implementation. Safety measures shall be explained to work force during the site safety talks by all site engineers and foremen, to let the work force aware about the hazards and control measures required at site.

In case of any future activity, specific risk assessment shall be produced on site prior to start the work. Site HSE inspection and audits shall be conducted to make sure that all safety measures in place and properly maintained.

Hazard Classification

Hazards are classified as Extreme, High (H), Medium (M) and Low (L) to describe potential severity in the event of an incident.

"Extreme"- A condition or practice likely to cause fatalities or permanent disability, loss of life or body part and/or extensive loss of structure, equipment or material. Work can't be continued until reduce the risk to an acceptable level.

"High"- A condition or practice likely to cause permanent disability, loss of body part and/or extensive loss of structure, equipment or material.

"Medium"- A condition or practice likely to cause serious injury or illness (resulting in temporary disability) or property damage that is disruptive, but less severe than "High".

"Low"- A condition or practice likely to cause minor (non-disability) injury or illness or non-disruptive property damage.

11.4 Compliance Obligation

The HSE team is responsible for collecting, maintain and updating the respective legislation, regulation and other relevant documents concerning HSE issues applicable to the organization's activities.

The procedure defines the process for obtaining, assessing and ensuring that requirements of the legislation and incorporated into the relevant procedures, or where necessary, formulated into new procedures and added to QMS.

Compliance obligation shall be conducted at irregular intervals through inspection and audit to ensure compliance is being implemented. A legal compliance register will be recorded, monitored and reviewed.

11.5 Emergency preparedness and response

It is very important that emergency response procedure will be communicated, implemented, and regularly tested. A good emergency response procedure saves lives and protects company assets. The main objective of this procedure is to prevent, lessen, and

	Issue 01 Rev-00
QUALITY MANAGEMENT SYSTEM MANUAL	Date: 05/01/2025
	Page 38 of 44

manage foreseeable emergencies. The main priority is tackling with emergencies is not to endanger the personnel safety of the people involved.

Purpose:

- Avoid or limit the impact of the emergency to personnel, property and the environment.
- Increase and effectively maintain an organizational framework and the environment.
- Provide a list of actions, which much is taken in an emergency with clear instructions.
- Assign and authorize personnel responsible for taking specific responsibilities and instructions.
- Provide communication channels essential to co-ordinate within the project and externally with appropriate emergency service.
- Affix the emergency plans with detailed emergency numbers shall be displayed on different areas of the site. The project HSE Engineer shall coordinate with the project manager for conducting the Emergency drills on site, the Fire Drill shall be conducted on quarterly basis. Training for emergency purpose shall be conducted as per training matrixes The Emergency exit and necessary details shall be included on induction talk. The project Manager is responsible for all emergency procedures on site and HSE Engineer will look after and schedule the events like Emergency preparedness training and awareness training.

Objective:

The need of a planned emergency response procedure is declared and proper training and drill are conducted to each employee to have a significant role to play in fulfilling the goals of the health, safety and environment policy of Company.

During construction, there are many activities which present high risk. Many of these activities are planned and controlled. However, in emergency situations incidents have already escalated and the situation requires the controlled management of workers, staff and subcontractors with a planned series of actions and events to reduce the severity of an incident or emergency.

Fire is the most significant emergency risk but we also need to consider the response to other emergencies such as medical emergency, environmental emergency, equipment failure emergency etc.

11.6 HSE Incident Reporting & Investigation

Purpose:

G.M.DALUI & SONS PRIVATE LIMITED	CCPL/QMS/01
	Issue 01 Rev-00
QUALITY MANAGEMENT SYSTEM MANUAL	Date: 05/01/2025
	Page 39 of 44

To ensure that all incidents are reported, recorded and analyzed, and that corrective action is taken to prevent recurrence.

To ensure that such reporting is done through a coherent system that would give the management all appropriate tools to efficiently monitor HSE performances, and to perform relevant systematic analysis of reported incidents.

Incident Management

1. Immediately assess the seriousness of the situation.
2. Eliminate and contain hazards. If necessary, remove non-essential personnel on area of danger.
3. Provision of First Aid as soon as possible
4. Call ambulance immediately, if a life threat occurs.
5. Secure the area
6. Find out where the injured person(s) was taken
7. Inform the Project Manager. Project Manager shall inform the Client immediately.

Incident Notifications

G.M.DALUI & SONS PRIVATE LIMITED shall officially notify Sector Regulatory Authority (SRA) within 24 hours of an incident occurring at a work place which result in following incident types (Reportable Incidents)

- Fatality
- Reportable Serious Injury
- Reportable Dangerous Occurrence
- Receipt of a written diagnosis or other knowledge of the occurrence of reportable Occupational illness or Disease arising out of and in the course of work
- Major or moderate Environment Incident

Incident Reporting & Investigation

The following steps present the incident reporting process; incident form shall be filled out by the HSE officer:

Step 1: Incident Classification – reporter have to determine whether it is Incident, Near Miss or Dangerous Occurrence. (Check the definition of each classification). Box shall be ticked by reporter. e.g. for an incident resulted in medical treatment case for an employee, reported shall tick the boxes of incident.

Step 2: Severity Classification – this will be the actual and potential severity to People, Assets, Environment or Reputation. A Near Miss shall always have a zero-actual severity but the potential severity could equal or greater than 2.

G.M.DALUI & SONS PRIVATE LIMITED	CCPL/QMS/01
	Issue 01 Rev-00
QUALITY MANAGEMENT SYSTEM MANUAL	Date: 05/01/2025
	Page 40 of 44

Step 3: Injured persons – state the name, employer, trade, I.D. No., Employee no., Nationality, age and gender. (if multiple persons are injured, get the exact number and provide a list.)

Step 4: Summary of incident – an abstract of the incident

Step 5: Details of Incident – what was done, where, by whom, how

Step 6: Immediate action taken to eliminate the Incident: an action to secure the area of the incident such as Stopping an activity near or within the vicinity of the incident until corrective actions are in place, permit to work system, or thorough inspections.

Step 7: Causes of Incident – to find out the underlying and immediate causes

Step 8: Further Recommendations to prevent recurrence in future: a further corrective action included but not limited to:

1. Housekeeping
2. Tool Box Talks
3. Regular Inspections
4. Safe systems of work to be followed
5. Permit to Work System
6. Information, Instructions, Training & Supervision
7. Equipment Maintenance

Step 9: Reported by - a person who initiated the report. (HSE officer/Manager)

Reviewed by - Project Manager and HSE Manager

Step 10: Distribution – Copies of the report shall be distributed to Project Manager, Project/Facility

Analyzing data

Incident Review follows Investigation and is principally concerned with preventing the recurrence of incidents via discussions on underlying causes and remedial actions. Incidents should be reviewed to a level of detail commensurate with Risk Potential.

The HSE Manager's prime responsibilities are:

- To challenge and test investigation team to ensure all active and latent failures are identified.
- To review and endorse the actual severity and potential risk rating provisionally assigned to each incident.
- To endorse recommended corrective and remedial action items
- To confirm actions, action parties and deadline for close out.
- To determine appropriate lateral learning method to ensure that all key personnel are adequately informed to prevent a reoccurrence.
- Minutes of the Incident Review meetings shall be recorded.

Action plan
